

SEAGER
MEMORIAL CLINIC

2025 ANNUAL REPORT

January 1 - December 31, 2025

Our mission is to provide free, easy-access, non-judgmental, charitable medical, dental, vision, and mental health care to the underserved. Everything we do is provided 100% free to everyone who comes seeking care from us!

Life-Saving Heart Procedure Provided for Uninsured Patient

A patient from Pakistan visited the Seager Memorial Clinic after residing in the United States for about six months. Uninsured and experiencing cardiac symptoms, he brought numerous medication bottles, all labeled in a foreign language. Our team—pharmacists and doctors alike—meticulously identified the correct equivalents for each medication. Subsequently, we referred him to a cardiologist through Intermountain Health's voucher program, which provides financial assistance to uninsured patients seeking necessary care.

Before his cardiology appointment, the patient underwent several diagnostic tests. During one of these, it was discovered that he required an immediate, life-saving heart procedure. He received the necessary treatment and returned to our clinic for follow-up care a few weeks later. He expressed profound gratitude, noting significant improvements in his health and physical appearance. Observing him, it was evident that he felt more at ease, reassured that he was receiving the medical care he needed and that we were committed to his well-being.

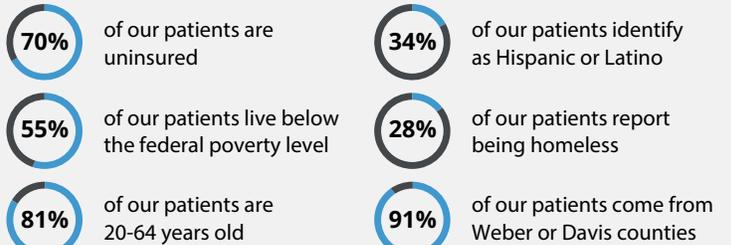

Free Services

- Physician/provider visits
- Lab work
- Dental Clinics
- Diagnostic testing
- Eye Clinics
- Immunizations
- Mental Health Medication Clinics
- Cancer screenings
- Diabetes management
- Prescription and over-the-counter medications
- Podiatry Care
